

Danielle Lindblom – Frontend Developer

Danielle.Lindblom@gmail.com | (218) 205-4992 | Missoula, Montana | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Frontend Developer specializing in building accessible, responsive web applications using React.js, Next.js, and **TypeScript**. Proven ability to ship production-ready code from Figma designs under aggressive timelines, including a 6-day marketing landing page launch for Great Harvest Bread Company. Certified **accessibility** professional (CPACC), leading WCAG audits and resolving 50+ critical accessibility issues across SaaS platforms. Known across teams for turning technical expertise into shared capability — through mentorship, structured training, and **process improvements** that speed onboarding and reduce recurring support needs.

SKILLS

Frontend Technologies: React.js • Next.js • TypeScript • JavaScript • State Management

Styling & UI: Tailwind CSS • shadcn/ui • Material UI • Sass/SCSS • Responsive Design

Quality & Testing: Web Accessibility (WCAG) • Jest • React Testing Library • Unit Testing

Core & Workflow: HTML • CSS • Git • GitHub • Agile/Scrum • Pull Requests • Code Reviews

Data & Deployment: Node.js • SQL • Firebase • Vercel • AWS S3

EXPERIENCE

Content Software Developer

Total Expert – Financial Services SaaS Company (remote)

August 2025 – Present

- Delivered 18 urgent custom content tickets for a single enterprise client in 26 hours — less than half the 72-hour estimate — with zero quality issues and 2 days ahead of deadline.
- Led same-day diagnosis and resolution of a high-visibility enterprise customer's branding logic failure, immediately reverting affected code to prevent further disruption and delivering fixes in time to meet their launch deadline.
- Initiated and led 3 internal trainings for new coordinators that eliminated developer clarification cycles, enabled coordinators to independently handle previously developer-owned tasks, and significantly reduced new employee onboarding time.

Frontend Developer & Accessibility Lead

Freelance (remote)

April – August 2025

- Delivered custom websites for multiple clients under aggressive timelines, completing Great Harvest Bread Company's marketing landing page in 6 days and Quantiiv's multi-phase restaurant consultancy website project across two 7-day sprints.
- Developed responsive web components using **Next.js**, **React.js**, **TypeScript**, **Tailwind CSS**, and **shadcn/UI**, working directly with customers and small business owners to translate detailed Figma designs into production-ready, cross-browser compatible code across multiple pages and sections.
- Identified and resolved 32+ critical **accessibility** issues across projects through repeated audits, using testing tools and comprehensive code analysis, ensuring WCAG compliance and inclusive user experience.

- Independently designed, developed, and delivered a multi-page website for local small business, consolidating information previously scattered across Facebook and reducing her administrative burden from repetitive customer inquiries.

Frontend Engineer

Gridiron Survivor Apprenticeship (remote)

October 2024 – August 2025

- Built and maintained two prototype SaaS applications using **Next.js**, **TypeScript**, **React.js**, **shadcn/ui**, and **Tailwind CSS**, ensuring code reliability through comprehensive unit testing with **Jest** and **React Testing Library** while participating in Agile/Scrum workflows and rigorous code reviews across large, complex repositories.
- Created a Pull Request process training for 12 team members that significantly reduced senior developer support requests and served as an ongoing reference for new contributors.
- Spearheaded **accessibility** audit of SaaS web app, identifying 24+ issues and organizing findings into prioritized, actionable tickets, ensuring WCAG compliance.

Implementation Specialist

Submittable – Grant Management SaaS Company (remote)

February 2022 – June 2024

- Built and deployed mission-critical intake form for Minnesota's \$1B Tax Rebate Program in under 2 weeks, creating complex multi-lingual solution with accessibility and inclusion best practices to serve thousands of citizens with a smooth launch.
- Onboarded 100+ new customers utilizing a robust intake process, **project management**, and detailed **technical training** that improved customer time-to-value and platform adoption.
- Drove **accessibility** excellence as core Accessibility Team contributor, identifying customer pain points, sharing best practices, and resolving technical barriers.
